

FIRE ISOLATOR

Datasheet FireBlanket Economy

Product description

The Fire Isolator Car Fire Blanket Economy is our most affordable Car Fire blanket and can be used for internal Combustion Engine cars and for Electric vehicle fires. The FI-BLECON0806 can handle a peak temperature of 1100°C (2000°F) and a sustained temperature of 800°C (1450°F). The blanket has an open weave structure and will 'breathe', preventing a possible buildup of vapor and gases under the blanket. By applying water mist and the potassium nitrate aerosol units, the temperature is reduced, which ensures a reusability of the FI-BLECON0806 blanket of max 2-3 times.

It can be deployed in parking garages, parking lots, shop-ping malls, onboard ferries, etc. The blanket can be used for all car sizes from a small city car up to large SUV models.

Dimensions & Specifications

Art. no: FI-BLECON0806

Dimensions: 8 x 6 m*

Weight: 29 kg

Material: 70% Highest quality Silica,
glass fiber mixture

Temperature
resistance: + 1100 °C peak

Classification: The High-quality silica fabric is DIN EN
13501-1 classified with A1 certificate by
KIWA/ MPA, ASTM D6413 classified by HPL
Engineering

Usage: 2-3 times reusable when applying water
mist and aerosol units

HS code: 70199000

Pictures

- Supplied in sturdy smartbag
- Cabinet available
- Big coloured loops for easy handling of the blanket
- Trolley and backpack available
- Suitable from small cars to large Pickups
- No expiration date, shelflife of 25 year+ if properly stored

* The blanket has a tolerance of +/- 5% in width and length,
which can be affected by temperature and moisture.
